

PREMIERE BARRIER
ADDITIVE FOR BOTH
PE AND PP MATERIALS

KORTRAX[®]
BARITAINER[®]

THE PACKAGE-PROVEN ADVANTAGE

- A unique barrier resin additive for HDPE, LDPE and PP based resins
- Not a surface treatment but introduced into the resin formulation
- An additive to the masterbatch at various let down ratios (LDR)
- Safe and sustainable solution for Barrier/PE rigid packaging
- An effective and economical solution for Barrier/PE rigid packaging
- Eliminates the need for post-mold fluorination
- Does not require additional handling and logistics

ADDITIVE IMPROVING
YOUR SUSTAINABILITY
AND MANUFACTURING
OPERATIONS

THE PREMIERE BARRIER SOLUTION

- Provides highly effective permeation barrier
- Container is PFAS/PFOA-free which means no hazardous chemicals
- Prevents permeation of potentially toxic, flammable, or environmentally dangerous chemicals
- Provides oxygen and water vapor barrier to protect product freshness
- APR HDPE Critical Guidance finds Kortrax[®] acceptable in the HDPE recycling stream
- Manufacturing LCA parameters that are from one fourth to orders of magnitude less than metal
- No supply chain issues as seen in EVOH or metals
- Improved economics versus fluorinated PE and/or multilayer structures
- End user is responsible to verify and ensure compatibility with specific formulations
